E-mail and cloud services

We take care of all your IT needs: including e-mail, file servers, and backups. Data is stored in a highly secure data center, with 24 hour security guards, protected against fire, flood, theft, hacking attempts etc. In short : storing your data with us is much more secure than at your site.

Instead of purchasing expensive equipment, software updates, or even hardware maintenance, you can migrate your IT needs into the cloud, lowering your costs and simplifying your budget.

Our cloud services are available anywhere and everywhere you have an internet connection, no matter your device(laptop, tablet, smartphone) or operating system. If your company changes locations all you need is an internet connection to have access to all your cloud based IT solutions.

Our cloud services

1. Cloud based file backup- any.cloud backup

All backups are securely stored online, accessible anywhere and anytime you have an internet connection.

Any.cloud backup protects your data, with continuous monitoring, access, protection against fire, redundantly powered (including UPS), and with multiple fibre optic trunk lines. We secure any amounts of data. Data is stored within the EU in an the advanced datacenter InterXion in Copenhagen.

3. Cloud based E-mail - any.cloud connect.

We offer Hosted Exchange and any.cloud connect services- Your cloud based office leaves you mobile and independent of any physical location, all tailored to your needs and budget.

Sharing contacts, calendars, organizing meetings and booking conference rooms (Resource Management). The any.cloud connect service provides that e-mails are always available and fully synchronized between your devices and protected against spam and viruses. Additionally any.cloud connect protects your private and business data with the ability to remotely wipe data via the feature „remote swipe”. In case of loss or theft e-mails, contacts, and calendars can be remotely deleted.

2. Easy file exchange - FTP dropbox

Your partner companies don't have cloud services? We provide our FTP dropbox – you can email a file download link to clients, and ,just as easily provide access to space dedicated for designated guests.

There is no more need to launch an ftp program, enter a ftp address, and search for forgotten passwords!

zgoda.net

4. Virtual servers - any.cloud VPS

Thanks to the any.cloud services solution you obtain full access anywhere you have an internet connection. It is up to you what roles the servers will handle: e-mail, WWW, CMS, CRM, SQL, or other services. All VPS servers are hosted in a secure maintained datacenter which means a guaranteed 99,9%uptime. We guarantee against flood, fire, and theft.

Server VPS (Virtual Private Server) all the features of a dedicated server and more. Benefits include on demand immediate scaling for your needs at attractive pricing. VPSs easily scale with your growing company, without the need of purchasing new equipment. You have full access to Windows or Linux environments, which will support all your needs: from website hosting to MS exchange servers, file servers, or even SQL.

We can virtualize any of your hosting needs, anything currently run on your hardware can be migrated to a virtual environment!

Any.cloud VPS servers are hosted in Denmark in the datacenter InterXion.

Virtualization is done by utilizing vmWARE Enterprise Plus.
